/web/lib/ServiceBeans.jar;/web/lib/WebForms.jar Page 2 This maven compiles Jasper files to the target directory. - Alex Motivation The original jasperreports-maven-plugin from org.codehaus.mojo was a bit slow. How much is this artifact used as a dependency in other Maven artifacts in Central repository and GitHub: How many Android projects use it: How is this artifact used: This maven compiles Jasper files to the target directory. I tested it with 52 reports which took 48 seconds with the original plugin and only 4.7 seconds with this plugin. /web/lib/ServiceBeans.jar;/web/lib/WebForms.jar true Courier UTF-8 true You can also add extra elements to the classpath using ... If you are interested, please open an issue to reach me. Usage You can use the plugin by adding it to the plug-in section in your pom; com.alexanderiof.jasperreports-maven-plugin 2.8 process-sources jasper net.sf.jasperreports.engine.design.JRdtdCompiler src/main/jasperreports \$(project.build.directory)/jasper_jasper true false 4 true org.codehaus.plexus.compiler.util.scan.StateSourceScanner If you want to pass any Jasper options to the compiler you can do so by adding them to the configuration like so: ... your.classpath.element You can also use this alternative approach for JARs: ... This plugin is 10x faster. ... I've not used this plugin myself in years, so I'd like to hand this project over to people who actually use it.
